Profile

I am a passionate and dedicated M&E specialist with over 5 years' experience in M&E. I have mastered the design of MEAL tools and frameworks and reporting for different donors. I am a researcher possessing skills in qualitative and quantitative data collection, entry, cleaning and analysis using advanced Microsoft excel, SPSS, Stata. I have mastered design of data collection tools (both offline and online) and databases. I have experience in conducting baseline and end term evaluations.

Employment

Monitoring, Evaluation, Accountability and Learning (MEAL) Officer | Nov 2021 – Present

Act 4 Africa Uganda, Uganda

- Monitoring, Evaluation, Accountability and Learning (MEAL) Officer with over 5 years of progressive experience supporting donor-funded health, SRHR, and community development programs. Lead the design and implementation of MEAL systems, evaluations, and learning processes to strengthen programme quality, accountability, and evidence-based decision-making. Key contributions include:
- Designed and operationalized MEAL frameworks, log frames, indicators, and data-collection tools for multiple projects, including SRHR, adolescent mothers, maternal and infant health, and She Leads programmes.
- Led baseline and endline evaluations, including tool development, field data collection, analysis, and dissemination of findings to inform programme adaptation and learning.
- Developed and implemented a MEAL strategy and implementation plan for the Adolescent Mothers Project, providing a clear roadmap for tracking progress and improving programme performance at district level.
- Led preparation of donor reports, including the UK Aid-funded Improved Health and Wellbeing end-of-project report, which achieved an "A" performance rating.
- Established and operationalized a beneficiary feedback and complaints mechanism (FCRM), strengthening accountability to affected populations and programme responsiveness.
- Mentored project staff on donor reporting requirements, data quality standards, and results-based monitoring to improve compliance and reporting consistency.
- Conducted routine field monitoring and data verification visits to ensure data accuracy, integrity, and adherence to MEAL standards.
- Led documentation of success stories, learning briefs, and reflection reports, supporting evidence-based reporting, organizational learning, and external communications.
- Responded to donor, partner, and senior management data requests in a timely and accurate manner, supporting decision-making and programme oversight.
- Designed the baseline tool for the Grains for growth agricultural program and led the team to conduct the survey.
- Periodically wrote reports from pre-harvest and post-harvest trainings to update the donors on progress of the Grains for growth program.

Data Clerk attached to Bugono HC IUniversity Research Co., LLC (USAID RHITES-EC), Uganda(2017/2018)

- A well-organized ART clinic: Ensured patient files were well stored and easy to retrieve on clinic days by classifying them according to the patient characteristics i.e. none suppressed, children, and adolescents, active and lost clients.
- Improved data capture: HIV care data captured on patient forms during patient visits was transcribed to PRE-ART and ART registers and also updated in the patient database.
- A functional Uganda EMR; Entered 1400 patient records in Uganda EMR and updated patient encounters for 688 active clients on every clinic day.
- Timely reporting: Weekly surge, monthly, and quarterly reports on PEPFAR, MOH and RHITES-EC indicators were compiled and submitted on time.
- Better quality data of in HSD; Facility and all HSD reports were validated before Entry. I also cleaned monthly (HMIS 105,012) and quarterly data (HMIS 106A) for 17 facilities from January 2018 to December 2018 in time.
- Improved data utilization at the site; Data from HMIS reports was analyzed and graphs were pinned regularly to reflect performance. A better understanding of HMIS tools by health workers. This was done through Mentoring health workers in filling and updating HMIS tools (registers). These included OPD registers, ANC, maternity, postnatal, EID, PRE-ART and ART registers.
- Mentored the health workers in compilation of HMIS105, 106a, and data utilization.
- Supported data cleaning and Data Quality Assessments in the district.
- Monitored Quality Improvement projects at the site.

Aug 2016 - Jun 2017

Monitoring &Evaluation assistant (PREFA)

- Collected and verified HMIS data from 21 PREFA supported sites in Wakiso and 20 sites in Luwero district.
- Entered reports in hybrid for PREFA supported sites and synchronized them with DHIS2 reports.
- Monitored weekly option B+ reporting and monthly retention of ART patients.
- Mentored records assistants in proper filling HMIS 105 and the different registers at the facility.
- Conducted Data Quality Assessments on monthly and quarterly HMIS reports.
- Entered and analyzed data for the SRHR project.

Program intern, Monitoring and Evaluation department (PREFA)

- Entered data into the different PREFA databases, and hybrid.
- Collected and verified data monthly data from PREFA supported sites.
- Filed all the reports collected from the facilities and ensured safety of M&E data.

Core Skills & Technical Competencies

- **Monitoring, Evaluation, Accountability & Learning (MEAL):** Strong experience designing and implementing MEAL frameworks, log frames, indicators, and monitoring plans for health, SRHR, adolescent mothers, and community development programmes.
- **Baseline, Endline & Applied Evaluations:** Hands-on experience leading baseline and endline surveys, including tool design, data collection coordination, analysis, and dissemination of findings to inform programme improvement and donor reporting.
- **Results-Based Monitoring & Reporting:** Skilled in developing results frameworks, workplans, and logical framework matrices to support programme monitoring, performance tracking, and compliance with donor requirements.
- **Data Collection, Management & Quality Assurance:** Proven capacity in quantitative and qualitative data collection, data entry, cleaning, validation, and Data Quality Assessments (DQAs) to improve data accuracy, completeness, and reliability.
- **Health Information Systems & Routine Data:** Solid experience working with HMIS, DHIS2, and Uganda EMR, including data validation, reporting, and mentoring facility staff on proper use of registers and reporting tools.
- **Data Analysis & Interpretation:** Proficient in data analysis using advanced Microsoft Excel, SPSS, and Stata, with ability to generate tables, summaries, and insights to support evidence-based decision-making.
- **Accountability to Affected Populations (AAP):** Experience establishing and implementing beneficiary feedback and complaints mechanisms (FCRM) to strengthen accountability, programme responsiveness, and community engagement.
- **Learning, Documentation & Knowledge Sharing:** Skilled in compiling learning and reflection reports, documenting success stories, and facilitating internal learning sessions to support organizational learning and adaptive programming.
- **Capacity Building & Mentorship:** Experience mentoring project staff and health workers on MEAL tools, reporting standards, data quality, and use of routine monitoring data.
- **Field Monitoring & Verification:** Experienced in conducting routine field visits for monitoring, data verification, and follow-up to ensure compliance with MEAL standards and improve reporting quality.

Education

- **Postgraduate diploma in Monitoring and evaluation, Uganda Management Institute (2025)**
- **Bachelor of Statistics and Economics, Kyambogo University, Kampala Uganda, Kampala Uganda (2016)**

Languages

- **French-** Moderate
- **Luganda** -Fluent
- **English** - Fluent

Certificates

- **Monitoring and Evaluation Fundamentals (2016)**
- **Data management and analysis using Ms. Excel, data modeling using STATA (2016)**
- **IT essentials, Makerere university (2016)**
- **Health Management Information Systems training, URC-CHS (2017)**
- **Uganda Electronic Medical Records training URC-CHS (2017)**
- **District Health Information System 2 training, URC-CHS (2017)**
